In computer networking, upstream refers to the direction in which data can be transferred from the client to the server (). This differs greatly from downstream not only in theory and usage, but also in that upstream speeds are usually at a premium. Whereas downstream speed is important to the average home user for purposes of downloading content, uploads are used mainly for web server ...

This lesson explains Straight-Through and Cross-Over cables and the difference between Straight-Through and Cross-Over cables. Why we need crossover cable to connect two computers together directly? Where to use Straight-Through cables? Where to use Cross-Over cables

Straight-Through and Cross-Over cables, Difference between ...

This lesson explain Common Network Cable types, Coaxial cables, coaxial cable BNC Connectors, STP and UTP cables, RJ45 jack, Difference between STP and UTP cables, STP and UTP Cable CAT (Categories), twisted pair STP and UTP Cable categories and their supported bandwidth speeds and Fiber SMF and MMF cables

Coaxial cables, Twisted Pair STP and UTP cables, Twisted ...

"I have been buying High-Speed HDMI Cables, Optical Audio Cables and all kinds of cables from My Cable Mart for years and I tell EVERYBODY I can to do the same.

My Cable Mart

An Ethernet crossover cable is a crossover cable for Ethernet used to connect computing devices together directly. It is most often used to connect two devices of the same type, e.g. two computers (via their network interface controllers) or two switches to each other. By contrast, patch cables or straight through cables are used to connect devices of different types, such as a computer to a ...

ABOUT TRIPP LITE. From desktop to critical infrastructure, Tripp Lite products and solutions power and connect the computers, networking equipment and electronic devices that form the foundation of our digital world.

Product Catalog | Tripp Lite

You can run a CAT5 (Ethernet) cable up to 300m or 328ft without any signal loss so you are good with the length and should not see any loss. Just be sure though to plan the cable route so it does not cross or go near any AC mains cables (the ones that go to plug sockets ect) as you will get AC induction on the CAT5 and it may interfere with the signal being set down it (We use CAT5 on some ...
