

Governing The Provision Of Ecosystem Services 4 Studies In Ecological Economics

Governing The Provision Of Ecosystem

Ecosystem services are the many and varied benefits that humans freely gain from the natural environment and from properly-functioning ecosystems. Such ecosystems include, for example, agroecosystems, forest ecosystems, grassland ecosystems and aquatic ecosystems. Collectively, these benefits are becoming known as 'ecosystem services', and are often integral to the provisioning of clean drinking ...

1. Introduction. The concept of ecosystem services (ES) presents a useful way of thinking about the relationship between human welfare and nature, with the literature on ES having grown exponentially since the 1990s (Costanza et al., 2017, Costanza and Kubiszewski, 2012, Droste et al., 2018, McDonough et al., 2017). The popularity of the concept grew further through the publication of the ...

James is currently involved in two research projects with colleagues. The first is aimed at developing a valid model that will provide an economic estimate (i.e. dollar value) of the broader social benefits associated with the provision of, and participation in, club-based organised community sport in Australian society.

Professor James Skinner | Loughborough University London

Genetically modified food controversies are disputes over the use of foods and other goods derived from genetically modified crops instead of conventional crops, and other uses of genetic engineering in food production. The disputes involve consumers, farmers, biotechnology companies, governmental regulators, non-governmental organizations, and scientists.
