Modern Electroencephalographic Assessment Techniques Theory

Electroencephalography (EEG) is an electrophysiological monitoring method to record electrical activity of the brain. It is typically noninvasive, with the electrodes placed along the scalp, although invasive electrodes are sometimes used, as in electrocorticography. EEG measures voltage fluctuations resulting from ionic current within the neurons of the brain.

Pain in babies, and whether babies feel pain, has been a large subject of debate within the medical profession for centuries. Prior to the late nineteenth century it was generally considered that babies hurt more easily than adults. It was only in the last quarter of the 20th century that scientific techniques finally established babies definitely do experience pain - probably more than ...

Introduction. Tinnitus is the perceived sensation of sound in the absence of a corresponding external acoustic stimulus. Unlike auditory hallucinations, which are phantom phenomena that occur mainly in people with mental disorders and manifest as the perception of voices and musical hallucinations, in which instrumental music or sound is perceived, tinnitus sensations are usually of an ...

Food choice is a complex phenomenon that is not yet well understood. The study of food decision making could greatly benefit from neuromarketing techniques to investigate the processes involved in food decision making, such as the influence of attitudes and emotions on choices, which traditional segmentation variables, such as socio-demographics, psychometrics, and stated preferences, do not ...

Source: Costa et al. 1981. Cardiovascular disorders. Kristensen (1989) has analysed the relevant studies on the incidence of cardiovascular disorders in shiftworkers for methodological and analytical factors, as shown in table 43.2. Papers published after 1978 were more likely to report an increase in cardiovascular disorders, particularly among those who transferred away from shiftwork.

The internet comprises a decentralized global system that serves humanity's collective effort to generate, process, and store information. A significant portion of this data is currently processed and stored in the cloud, and the last few years have witnessed the doubling of cloud storage and cloud computing. Given such tremendous growth there is an urgent need to create a stable, secure
