Neurological patients, Oliver Sacks has written, are travellers to unimaginable lands. An Anthropologist on Mars offers portraits of seven such travellers- including a surgeon consumed by the compulsive tics of Tourette's Syndrome except when he is operating; an artist who loses all sense of color in a car accident, but finds a new sensibility and creative power in black and white; and an ...

Oliver Wolf Sacks, CBE FRCP (9 July 1933 - 30 August 2015) was a British neurologist, naturalist, historian of science, and author. Born in Britain, and mostly educated there, he spent his career in the United States. He believed that the brain is the "most incredible thing in the universe." He became widely known for writing best-selling case histories about both his patients' and his own ...

Oliver Sacks - Wikipedia

The Man Who Mistook His Wife for a Hat and Other Clinical Tales is a 1985 book by neurologist Oliver Sacks describing the case histories of some of his patients. Sacks chose the title of the book from the case study of one of his patients which he names "Dr. P" that has visual agnosia, a neurological condition that leaves him unable to recognize even familiar faces and objects.
